Oh, that's so great. I'm so glad to hear back from you and that your summer was a very good one on the whole. We should definitely catch up more by phone next week – I'm looking forward to it! In the meantime, I'm going to send along the reports so you can take a look. Thank you ever so much for taking a look at this. Mostly, I'd like your read on a) if the literature is accurately characterized b) the conclusions drawn from that literature is appropriate/supportable and of course c) anything else that catches your eye.

In the Buell & Associates report, the relevant section is 3.4, which is on pages 58-66

In Dr. Carol Ann Woody's report, it's Number 6, which is on pages 11-12

Of course feel free to peruse any other sections that are of interest. These are publicly available documents.

So looking forward to talking with you! I sent along a note to Laurie telling her you say "Hi!"

Have a great weekend,

Rachel

Hey Rachel, so nice to hear from you!! I've been thinking about you two, wondering how things are going in DC, and

**Ex. 6 PII**

Anyway, the salmon nutrients issue is right up my ally, and I'd love to help. You'll probably not be able to shut me up though as I can ramble on about dead salmon for longer than you'll probably want. But, yes, let me know how I can help. I'd be happy to look over the reports, then maybe a phone chat next week? I'm mostly available Tues-Thurs (27-29th).

**Ex. 6 PII**

So, let me know what I can do to help. And, please say hi to Laurie for me!!

Cheers, Mark

Hi Mark,

How are you? I hope you have had a lovely spring and summer up there. It was a surprisingly nice summer here in DC –

**Ex. 6 PII**

It was nice to see your name pop up in my email box. It coincided with my seeing your name in a few citations for a couple reports that I'm reading. Which brings me to what inspired me to get in touch. There is a section in both reports (which are position papers of sorts) discussing the idea of enhancing water chemistry parameters, including nutrient supplementation, to increase the biological productivity of salmon populations. Since this is way outside my area of expertise, I'm curious what you would think about these papers – one promotes the idea and the other refutes it. Both cite you, in different contexts, as a reference.

Any chance you might be interested in discussing it or taking a look?

If not, I'd still love to hear about your latest Alaska adventures

**Ex. 6 PII**

Best,

Rachel

Hey there Rachel,

**Ex. 6 PII**

Enjoy winter riding! Let me know if you think you might be heading to Alaska sometime.

Cheers, Mark

Hi Mark,

Thank you very much! I appreciate your sending on the emails and letting them know. I don't want to be left out of the conversation and info exchange.

## Ex. 6 PII

I hope you had a good trip home - ours was long but uneventful. Keep in touch.

Thanks,  
Rachel

Hi Rachel,

Attached is the photo that Antoine sent of our group. You were not on the email list therefore have not been getting some of these emails. I'll forward to you a couple of my reply emails that you did not receive either. Mary caught this (a different Rachael is on the list) and passed this info along to some of us.

Cheers, Mark
